

THE SLOPE SONG

Tune: "Skip to My Lou"

Slope is Rise over Run we know
With the y's on top and the x's below
Subtract the terms to get it right
Simplify last for a wonderful sight!

Rise over run, y's over x
Rise over run, y's over x
Subtract the terms to get it right
Simplify last for a wonderful sight!

$$m = \frac{y_2 - y_1}{x_2 - x_1}$$
