

Slope of the Line Lyrics (Tune of Eye of the Tiger)

Rising up, as you look left to right,
Yeah that slope must be positive!
Vertical Lines, Rise, but never to run,
So that slope, it must be undefined!
Parallel lines have same slope
So they never intersect,
Next up, you have the meeting reciprocals
Perpendicular lines have arrived!
It's the slope of the line!
The trick that I've done tonight
Ratio of the rise to the run!
Take the difference of y over the distance of x,
And you know it's what we call the SLOPE of the line!
