

referee in youth soccer games. Write an expression to find how much money Jason will earn for refereeing any number of games. Let n represent the number of games Jason has refereed. How much will he earn for refereeing 6 games?

$$20n$$

$$20(6) = \text{\$}120$$

4. **SAVINGS** Kata has a savings account that contains \$230. She decides to deposit \$5 each month from her monthly earnings for baby-sitting after school. Write an expression to find how much money Kata will have in her savings account after x months. Let x represent the number of months. Then find out how much she will have in her account after 1 year.

$$230 + 5x = 230 + 5(12) = 230 + 60 = \text{\$}290$$

6. **ANIMALS** Write an expression to represent the total number of legs on h horses and c chickens. How many legs are there in 5 horses and 6 chickens?

$$4h + 2c$$

$$4(5) + 2(6)$$

$$20 + 12 = 32$$
